cont

N. (Amended) A display device comprising:
a substrate;
a plurality of light emissive elements arranged in a matrix form over said substrate;
a plurality of first thin film transistors formed over said substrate;
a plurality of second thin film transistors formed over said substrate and connected to said plurality of light emissive elements, respectively, wherein said one of [second] first thin film transistors is connected to a gate of one of said [first] second thin film transistors, wherein each of said light emissive elements comprises an organic electroluminescent
